

Is my **brilliant** healthtech innovation a **medical device**?

Is it:

- a mobile app or software
- a technical aid for compensating a disability
- an imaging device
- used for drug delivery
- a gene test
- used for birth control
- used for monitoring health or in diagnostics
- a therapy device
- designed for home use by lay people
- designed for health care professionals
- anything to do with health technology?**

➔ Your product might be a medical device.
